

HOW TO USE ...

TIMBER FS TWIST

71180 (70 mm), 71181 (100 mm), 71182 (120 mm)

Pre-treat residues with our SOFTCUT sanding pad.

TIMBER FS TWIST is excellently suited as a surface coat wood preservation sector. We recommend the practical PRONTO paint cup with brush holder.

Do you have to aim high? No problem: the possibility of combining with an extension bar makes even these jobs much easier.

The rotatable brush head also makes it possible to treat hard-to-reach areas perfectly. Eh'klar!
